## WORK EXPERIENCE

**Walmart**                                                                              **Mar. 2023 – Present**
*Seasonal Team Lead/Assistant Manager*                                                              *Garfield, NJ*
- Strong understanding of the advertising technology and data/performance measurement trends
- Play a critical role in building, inspiring, training and managing a sales and services team.
- Understand client's businesses and develop appropriate solutions to meet their needs.
- Work collaboratively with cross functional teams to drive revenue growth with new and existing customers.
- Ability to perform well in a highly dynamic, rapidly changing environment.

**Walmart**                                                                              **Apr. 2022 – Mar. 2023**
*Online pickup associate*                                                                              *Garfield, NJ*

**Walmart**                                                                              **Sep. 2018 – Apr. 2022**
*Stocking associate*                                                                              *Saddle Brook, NJ*

## PROJECTS

**Herdmaster - https://livestockapp.vercel.app**
My dad is a farmer back in Brazil and he manages his inventory with pen and paper, making it difficult to keep track of everything across numerous sheets. To assist him (and myself), I created an app that enables us to record cattle growth, health, purchases, sales, and even estimate profits. Crafted with **NextJS, ChartJS, Framer Motion, CSS Modules, ExpressJS/NodeJS, Mongoose/MongoDB.**

**AcaiShop - https://acaishop.onrender.com**
App for online acai ordering, users can choose different sizing options and add other stuff to their acai. Crafted with **Javascript, Sass, ExpressJS/NodeJS, Mongoose/MongoDB**. Using **Sendgrid** for emails and **Stripe** for payments. Using **JSON Web Tokens** for **authentication**. **Server side rendering with PUG**.

For more projects, please visit my portfolio at **https://pedroenriquedev.com** or my github profile **https://github.com/pedroenriquedev**.

## EDUCATION

**Bergen Community College**                                                                    **Currently enrolled**
*Computer Science*                                                                              *Paramus, NJ*
